Version identification

The value of **pdfuaid:part** shall be the part number of this International Standard to which the file conforms. If the file conforms to a version of this International Standard that is defined by an amendment to a part, then the value of pdfuaid:amd shall be the amendment number and year, separated by a colon.

The values of the pdfuaid:part, pdfuaid:amd and pdfuaid:corr properties do not by themselves determine conformance with any part of this International Standard.
