Page Content Order

In some situations, conforming writer may be unable to determine correct page content order for part of a document’s contents. In such cases, tag suspects (*PDF 1.6*) can be used. The conforming writer shall identify suspect content by using marked content with a tag of TagSuspect. The marked content shall have a properties dictionary with an entry whose name is **TagSuspect** and whose value is **Ordering**, which indicates that the ordering of the enclosed marked content does not meet Tagged PDF specifications.

Documents containing tag suspects shall contain a **Suspects** entry with a value of **true** in the mark information dictionary.
